About Me

I am a Web Developer specialized in the Front-End Development. I'm passionate to learn about new technologies and seeking a challenging position which will enable me to continuously learn, create, innovative and simultaneously contribute to the short term as well as long term goals to the organization. As a fresher with expertise in C++, Java, Python, HTML, CSS and JavaScript, I bring a combination of technical skills and a passion for programming to any organization that I work for.

Projects

Rana's Portfolio

2023– Present

Technology Used:

- HTML
- CSS
- JavaScripts

Project description:

It is a personal portfolio website which was made in VS Code Studio. Behind many research and development efforts applied to this project, daily development executed some small changes. Here is all about myself to showcase my skills, education, and projects..

TicTacToe Andriod Game

2022 – 2023

Project description:

A simple tic-tac-toe game for two players. The players take turns placing their marks on a 3x3 grid. The first player to get three of their marks in a row, horizontally, vertically, or diagonally, wins the game.

Interest

Machine Learning

Built a machine learning model to predict customer churn. The model was able to accurately predict churn with 85% accuracy.

Game Development

I am a highly motivated and creative individual with a passion for game development. I have been learning game development for the past few years, and I am eager to apply my skills to create innovative and engaging games.
